

I do not want the Federal Government to change Wisconsin's "No-call" provisions. My reason is simple - I pay for the telephone service as a convenience for myself and family members. If promoters want to use the telephone services that I am funding they should pay me for access the same as they are obligated to pay for the use of privately supported newspapers, magazine, television, etc.; otherwise they should have no right to disturb me, at my expense, for their self interest.
